Summary

Computer Science undergraduate at Queen Mary University of London (graduating 2027), with practical experience developing web applications, interactive software and integrating APIs. Experience with working on independent and collaborative technical projects. Seeking graduate computer science opportunities.

Education

Queen Mary University of London - Computer Science (BSc Hons) **Expected Graduation 2027**
First-year average: 82.45%
Second-year average: 78.7%

Bentley Wood High School – A Levels
Computer Science (A), Sociology (A), Classical Civilisation (A)

Technical Projects

FDM Expense App | React, JavaScript, Node.js, HTML, CSS

- Contributed to the development of a responsive expense management application supporting employee claim submissions and processing.
- Implemented interactive functionality for editing claims, attaching evidence and managing drafts and submissions.
- Built dynamic claim tables and status/comment displays, including budget policy checks and over-budget indicators.

Kitty Koffee | Unity, C#

- Independently developed a 2D top-down pixel-art game featuring randomized customer orders, an inventory system and timer based gameplay.
- Implemented order fulfilment and scoring mechanics and weighting, requiring players to memorise and achieve target scores within each round.

QMUL Weather App | JavaScript, HTML, CSS

- Contributed to the development of a weather application tailored to QMUL students, providing quick access to the weather conditions across different university campuses.
- Linked the application to real time weather API'S and location based functionality.

Technical Skills

Programming Languages: Java, JavaScript, Python, C#, PHP,
Web Technologies: HTML5, CSS3
Data bases: MySQL
Frameworks and Runtime Environments: React, Node.js
Development Tools: Unity, Git, GitHub, Gradle

Experience

Robothink Instructor | Robothink, Stanmore **07/2024 to Current**

- Teach robotics and coding concepts to children aged 4-14, adapting explanations to different abilities.
- Lead sessions with up to 25 children and troubleshoot hardware and coding complications.
- In constant communication with parents and school staff to support session delivery.

Coding and Robotics Club | Bentley Wood High School **09/2022 to 07/2023**

- Led coding and robotics activities for groups of up to 20 pupils aged 11-15, helping develop programming fundamentals and competition readiness.

Additional Information

Languages: English, Kurdish, Farsi | Paediatric first-aid trained | Enhanced DBS
